# 1 About

We are a cross-university research lab (Dartmouth College, University of Pennsylvania and Stanford University). The lab exists to serve as a nexus for work on affective polarization, social trust, and political violence.

Our lab focuses on addressing the following critical questions:

- What are the principal causes of affective polarization and what can be done to treat it?
- When and where does affective polarization alter behavior? Why?
- How effective and durable are approaches to reducing affective polarization?

## 2 Affect

**Question label:** democrat\_therm\_1

**Question text:** “We’d like you to rate how you feel towards some groups on a scale of 0 to 100. Zero means very unfavorable and 100 means very favorable. Fifty means you do not feel favorable or unfavorable.

How would you rate your feeling toward Democrats?”

### Responses
